Searching for an Australian supplier of Latex Mould Rubber in Australia? We supply latex moulding rubber to Melbourne Sydney Brisbane Adelaide Perth.

Search no further! Dalchem is a specialist supplier of Latex Rubber to the Australian and New Zealand automotive markets, prototyping, patternmaking, model-making and the movie industries to name a few.

Latex mold rubber is one of the most affordable mould making materials that you can find. You can use latex liquid to cast stone, create a concrete mold, cast polyester, polyurethane and many other casting resins.

The array of applications suitable for using latex mold rubber is huge and can be used on models made of metal, plastic, plaster, wood and glass. Some of the benefits of using Latex Rubber to create latex moulds are its strength and durability.

Latex liquid is supplied in both sprayable and brush-able form, we stock foam latex and have on offer a great premium latex mold rubber perfect for making quality latex moulds.

We stock large wholesale quantities of liquid Latex at our Melbourne premises. Whatever your choice, you can be assured of a great price at Dalchem! Our team is always on hand to give helpful tips and advice to help you create the

perfect latex mould.
